Bio

I'm a Front-End Developer who enjoys turning ideas into clean and user-friendly web apps. Most of my coding experience comes from working on personal projects with **React**, **Next.js**, and modern **JavaScript**. I like writing clean code, solving problems step by step, and I'm always learning new things to get better at what I do.

Skills

Technical Skills

- **Front-End Development:** React, Next.js, Redux, Zustand, Context API, JavaScript (ES6+), TypeScript, React Router, React Hook Form, Zod, React Query
- **Styling & UI:** HTML, CSS, Tailwind CSS, Sass, Bootstrap, Shadcn UI, MUI, Responsive Design
- **Backend & APIs:** REST API Integration, Basic Node.js, JSON, Axios, Fetch API
- **Tools & Version Control:** Git, GitHub, NPM/Yarn, Chrome DevTools, Postman
- **Other:** SEO Basics, Performance Optimization, Cross-Browser Compatibility, Figma

Soft Skills

- Problem-Solving & Analytical Thinking
- Clear Communication & Team Collaboration
- Attention to Detail & Code Quality
- Time Management
- Continuous Learning & Adaptability

Work Experience

Front-End Developer (Freelance / Independent Projects)

Jan 2023 – Present

- Delivered responsive, user-centric web applications and platforms tailored to client needs.
- Developed scalable e-commerce sites, landing pages, and real-time data-driven applications.
- Focused on clean, modular, and maintainable code with an emphasis on performance and usability.
- Managed version control and project workflows efficiently.
- Committed to continuous learning and adopting industry best practices to stay current.

Projects

Blue Berry – Modern E-Commerce Platform

A fully responsive and feature-rich e-commerce platform designed to provide a seamless online shopping experience. Built with Next.js, Clerk (authentication), Sanity (headless CMS), Stripe (secure payments), Tailwind CSS, Shadcn UI, Zustand (state management), and Framer Motion (animations).

- Implemented **secure user authentication** with Clerk and **real-time cart management** using Zustand.
- Integrated **Stripe payment gateway** for smooth and secure checkout.
- Designed and developed a **fully responsive, modern UI** with smooth animations using Framer Motion.
- Connected to **Sanity CMS** for easy product and content management.
- Utilized TypeScript for type safety and improved code maintainability across the application.
- Optimized loading speed and API performance for a better user experience.

Code Tutor – Interactive Landing Page for Online Programming Courses

A modern, responsive landing page designed to promote online programming courses and tutoring services. Built with React, Tailwind CSS, and Vite for fast development and optimized performance.

- Designed a clean and engaging UI with a strong focus on readability and visual hierarchy.
- Fully responsive layout ensuring a seamless experience across desktop, tablet, and mobile devices.
- Utilized Vite for rapid development and lightning-fast build times.

Weather App – Real-Time Weather Dashboard

A dynamic and responsive weather application that provides real-time weather data and forecasts with interactive charts. Developed using Next.js, React, TypeScript, Tailwind CSS, Moment.js for date handling, and Chart.js for data visualization.

- Implemented **real-time API integration** for accurate weather updates globally.
- Created **interactive and visually appealing charts** to display temperature, humidity, and other key metrics.
- Utilized TypeScript for type safety and improved code maintainability across the application.
- Ensured full responsiveness for optimal viewing on all devices.
- Focused on performance optimization and smooth user experience.
